

## **IOTTIE RELEASES SLEEK NEW VELOX™ SERIES MAGSAFE COMPATIBLE IPHONE ACCESSORIES**

*New stylish MagSafe series is the perfect complement  
to iPhone 12 and iPhone 13*

**NEW YORK, NY, September 28, 2021** – Best-selling consumer technology brand, **iOttie**, is excited to announce the launch of its **Velox™ series of iPhone accessories**. A new gold standard in style and technology, the Velox™ Wireless Charging Air Vent Mount and Velox™ Wireless Charging Power Bank are the first of a new series of products designed for MagSafe compatible iPhones, including the new iPhone 13.

With a slim and elegant design to elevate any car's interior, the **Velox™ Wireless Charging Air Vent Mount** is a MagSafe compatible accessory to keep your iPhone charged and visible while on the road. Its powerful magnetic grip will hold the iPhone 12 or iPhone 13 securely in place (even on rough roads) while simultaneously delivering up to 7.5W of wireless power. The Velox Wireless Charging Air Vent Mount is made with an aluminum housing for efficient heat dissipation, allowing any MagSafe series iPhone to charge with maximum efficiency. The mount has a super strong ball joint that is easily adjustable for optimal viewing angles. Silicone prongs provide a vice-like grip and allow the mount to be installed quickly and securely.

The **Velox™ Wireless Charging Power Bank** is a pocket-friendly portable battery pack and MagSafe compatible charger. Designed with the latest technology, its 5000mAh battery has enough power to add 30+ hours of extra usage to any iPhone 12 or iPhone 13. Its embedded auto detector senses your device, and automatically turns on wireless charging. When your phone is removed, the sensor will turn the power bank off to conserve battery. It is built as an iPhone portable charger, but thanks to its bi-directional USB-C port, it also works as a power bank for additional devices and accessories.

“We are proud to introduce a new, advanced class of wireless charging with iOttie’s Velox series,” said Eric Kang, vice president of iOttie. “The Wireless Charging Air Vent Mount and Magnetic Wireless Charging Power Bank keep the iPhone charged on-the-go while maintaining its stylish and functional design.”

The Velox series was meticulously developed by iOttie for MagSafe compatible iPhones, including the iPhone 12 and iPhone 13. Both are presented in midnight blue with a champagne gold trim, the Velox

series features silicone faces to provide enhanced grip, while also allowing for a more gentle connection to your device. The Velox Wireless Charging Air Vent Mount and Velox Wireless Charging Power Bank are each priced at \$54.95. The [Wireless Charging Air Vent Mount](#) will be available for preorder on Amazon and [available for purchase on iOttie.com](#) beginning September 28, 2021, with the Power Bank coming in November 2021.
