

Aivo Connect with Alexa Built-In

Automatic Clamping Wireless Fast Charging Mount

The Aivo Connect with Alexa built-in is the most advanced smartphone mount that features automatic clamping and Qi Wireless Fast Charging. Access over 100K Alexa skills for an enhanced hands-free experience that enables voice-activated navigation, calling, smart home automation, music, news, weather and much more. Aivo Connect features 3 internal microphones located on the front sides and back of the mount base with a noise-canceling software algorithm that allows the driver to invoke Alexa with added ease.

Mount smartphones automatically with a proximity sensor that detects and secures devices within close range. Simply place the device near the mount cradle to engage a servo motor, and the Arms automatically close to secure the device. Qi Wireless fast charging technology is integrated into the Aivo Connect— eliminating the need for a charging cable with an output of 10W on Android and 7.5W for iPhone devices. The Aivo Connect can be installed on any dashboard surface with a durable 3M adhesive pad for a strong secure hold while driving. The new Aivo Connect with Alexa Built-in delivers the ultimate voice-activated experience for a safer and more secure drive.

Key Features:

- Alexa Built-in: access over 100K skills on the road.
- Qi Wireless Fast Charging technology
