

Aivo Vue Dash Cam

Capture Your Driving Journey with the New Dashboard Camera from iOttie

The iOttie Aivo Vue is a premium dashboard camera that captures stunning HD videos and photos while adding security and safety to your daily commute. Engineered to deliver video recording on the go, Aivo Vue features an HD Camera capable of shooting 2560x1440P @30fps and 1920x1080P @60fps video resolution with a 140° wide angle view. The Aivo Vue also features a Sony STARVIS CMOS Image Sensor to allow recording in low light environments so you never miss a moment.

Access your collection of video recordings and photos on the iOttie View App for an organized view of content captured on the go. The Aivo Vue is designed with a Gyroscope sensor that delivers Lane Departure Alerts on the iOttie View App when the vehicle deviates and approaches or reaches the lane markings. Install Aivo Vue safely and securely with a durable 3M adhesive pad that adheres to the windshield surface of any vehicle.

Key Features:

- **HD Camera:** Capable of 2560x1440P@30fps and 1920x1080P@60fps video resolution with a 140° Wide angle view.
- **Main Processor:** ARM Cortex A7 Processor
- **Night Vision Sensor:** Sony STARVIS CMOS Image Sensor for low light sensitivity allowing clear imaging in low light environments.
- **Wi-Fi P2P:** With built-in Wi-Fi P2P Android smartphone users can access mobile data for the internet while connecting with dashcam using Wi-Fi.
- **Impact Detection:** Gyroscope sensor with collision detection instantly saves video of impacts for insurance claims.
- **Loop Recording:** Seamless Loop recording will be automatically activated when starting the engine. Recorded videos are saved in 1, 2 or 3-minute segments with an auto-looping mechanism.
- **Expandable Storage:** Supports up to 128GB SD Card (Class 10).
- Charging Adapter with built-in 12ft Micro USB Charging Cable
- **Microphone & Speaker:** Bluetooth connection & video recording notification.
- Software
- iOttie View App
